

MINES AND MINING STOCKS

COPPER RIVER BASIN.

Mineral Resources Discussed by U. S. Geological Survey.

A report entitled "Mineral Resources of the Lower Copper River Basin, Alaska," by Fred H. Moffit, of the United States Geological Survey, has just been issued as Bulletin 220-C.

The search for gold and copper which began in the mountains south of Chitina River, Alaska, with the rush of prospectors to the Copper River basin in 1898 has been carried on spasmodically since that time. As a result copper was found in the mountains east of Tatal during the first summer, and the gold placers of Bremner River were discovered a few years later. No copper has yet been produced in this district, according to the Geological Survey, but the facilities for transportation offered by the Copper River & Northwestern Railway during the last year have stimulated interest in the development of copper properties, so that considerable prospecting has been carried on.

One small stream, Golconda Creek, a tributary of Bremner River, has yielded most of the gold so far produced in this district, although Little Bremner River has contributed a part. Gold in commercial quantities has not been found near Tatal nor between the Chitina and the Bremner in Hanagar valley. The total production of the district is not known, but several thousand dollars worth of gold has been produced each year since mining began. The very high cost of supplies and difficulty of access have done much to discourage prospectors.

All the gold so far produced in the Bremner River valley has been obtained from stream gravels. This valley practically unprospected, so far as lode deposits are concerned. The three parts of the valley of present or prospective importance because of known placer-gold deposits are Golconda Creek, Little Bremner River, and the lower part of Bremner above the Little Bremner.

The report briefly describes the geology of the region so far as known and the prospects for the development of gold in the Bremner River valley, on Golconda Creek, and on Little Bremner River. It also discusses the character of the copper deposits in the mountains between Canyon Creek and Chitina River.

A copy of the report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

TURNS DOWN THE L. S. & A.

The American Mining, Smelting & Refining Co. of New York city, notified the directors of the Lake Superior and Arizona today, that the company has decided not to exercise its option on the property.

BROKERS' GOSSIP

Franklin.

The Franklin has on hand at present time about two hundred thousand pounds of milled copper, and this amount is expected to be increased to 300,000 pounds by the end of the month. The sale of this copper at the present price of the metal will give the company about \$71,000, in addition to raising \$225,000, which will be realized by the selling of the recent \$2 assessment on the stock.

Mayflower—Old Colony.

Mayflower's No. 22 drill has penetrated fifty feet of rich copper ground measuring vertically, and is still working in the same class of material. It is the same mineral zone encountered in holes No. 16 and 17, the correlation being precise.

The passing through seven feet of highly mineralized ground by Old Colony's No. 15 drill was a surprise. It was not known that No. 19 had been started and it was evidently put down east of No. 18, and demonstrates the value near the surface. The sludge from the drills just west of this latest strike showed copper content of 24 1/2 pounds to the ton. The Mayflower's No. 22, correlating with Nos. 16 and 17 on the Mayflower ground, extends the mineral zone considerably to the north.

These showings on Old Colony and Mayflower are the best so far, and there is increasing confidence in the future of these two properties at Lake Superior and in Boston. The drilling seems to demonstrate that a good Lake Superior lode to the east of Calumet & Hecla is awaiting development by shafts, the only problems now being as to the extent of the ore body north over Mayflower and south over Old Colony, and whether it will be a 17-pound proposition or a twenty-five pound proposition or something between.

Cleveland has a night school which offers students bathing privileges.

Kansas City has reduced the number of firemen. Economy measure.

Philadelphia is alarmed to note the number of foreigners crowding jails.

STOCKS

Boston—Pertinent news as regards the market was lacking today. Prices in general list just about held their own which was not at all encouraging because after such a break something of a rally should have been expected. Locally buying orders did not appear in sufficient volume to more than take care of the liquidation. While price changes were small they were towards lower prices. For the immediate future, market promises to be uncertain.

—L. J. Sturgis.

CURB STOCKS.

J. A. Minnear & Co., say today:

The big market has been irregular today, though a little stronger, the porphyry coppers holding their own with a fairly good demand, and the Lake Superior issues being weak. The C. & H. issues showed special weakness, and it is certainly apparent by the action of the Lake Superior stocks today that they lack friends in Boston. While it is true buyers can nearly defeat their prices, we cannot help but feel that it is advisable to take advantage of this power, and pick up a few shares of such issues as Alhous, Isle Royale, Superior, Centennial and Oscoda.

PRESERVED THE OLD STYLE

How One Young Bride Brought At-mosphere of the Past Into Her New Home.

A young bride who went to house keeping in her husband's old home was very much disappointed to find that his mother, with the very best intentions in the world had bought a lot of modern furniture and put away some really antique pieces, because she thought they were too out of date to please her boy's city wife.

The wife, however, in a quiet way found out that the new furniture had been purchased with the understanding that the bill be settled within six months. She talked the matter over with her husband and his mother and then with the proprietor of the store, and in the end, all the "modern" furniture was taken back and the same amount traded out for several beautiful rugs and the curtains for all the rooms on the first floor of the old house.

Then the bride went to work and fixed up all the "old fashioned" furniture which had been stored in the attic. A dining table was found and four chairs to match. These she had scraped and sandpapered, then a filler applied, and, lastly, a good quality varnish. This, when thoroughly dry was again rubbed down until the final finish was dull, and the effect was splendid. It suggested age, but good condition.

The young wife also removed the screens from the old fireplace and they laid down new hearth-stones of cream brick. And the most delightful inmate of the home was the mother, who saw in it all a vision of bygone days.

Black Fox Farming.

There is in Prince Edward Island a new development which is attracting great attention in the shape of raising of fur bearing animals. It has been proved that the climate of the province is particularly suitable for the breeding of black foxes, and a number of farmers have embarked in the industry with the most profitable results. The fur of the black fox, owing to its rarity, has become exceedingly valuable, and the commissioner of agriculture for Prince Edward Island states that a pair of live foxes were sold recently for \$5,000 and another pair for over \$4,000.

The price of this spring's pups was over \$2,000 a pair and \$1,600 a pair, while a cash deposit varying from 10 to 25 per cent is being paid for fox cubs that are due to be born in the spring of 1913. Black fox farming, as it is called, does not entail any considerable expense, the ranches consisting usually of an acre of ground with a steel wire enclosure about fifty feet square for two pairs, containing little houses for the animals.

Embarrassment of Riches.

"Wealth doesn't always bring happiness," remarked the youngster with the large spectacles. "Naw," asserted the other kid. "Look at me cousin yonder. He's got two cents and he can't decide between lollipops and ice cream."—Pittsburg Post.

PRIVATE WIRE.

Boston, Mass., Oct. 21.—Both markets were steady at the opening this morning and confidence gradually increased as the day went on. In spite of the lower levels however, the buying was small and the recovery was caused principally by short covering. We do not feel at all bullish on the market at present and we advise to keep in a strong financial position during the next few weeks when opportunities will probably be furnished to pick up some cheap stock. Liquidation in the coppers is small but the scarcity of buying orders furnishes no support and the declines are rapid in the inactive stocks such as Oscoda, Alhous and Superior Copper.—Foster.
